# Correlation coefficients between ACR and SAMVIQ

QVGA	0.969
CIF	0.94
VGA	0.942
HD	0.899

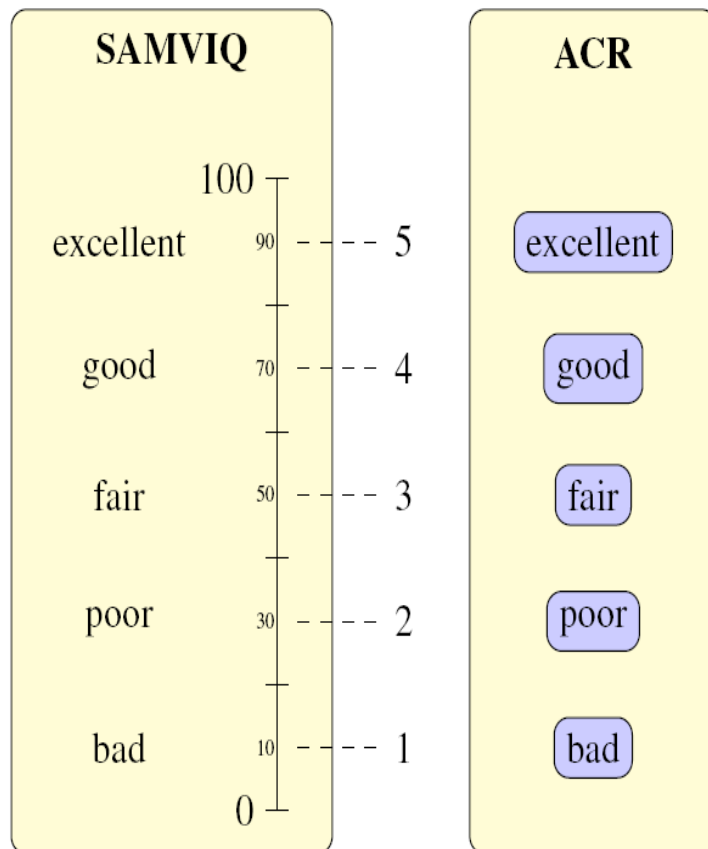

# HD set

# Scales adjustment

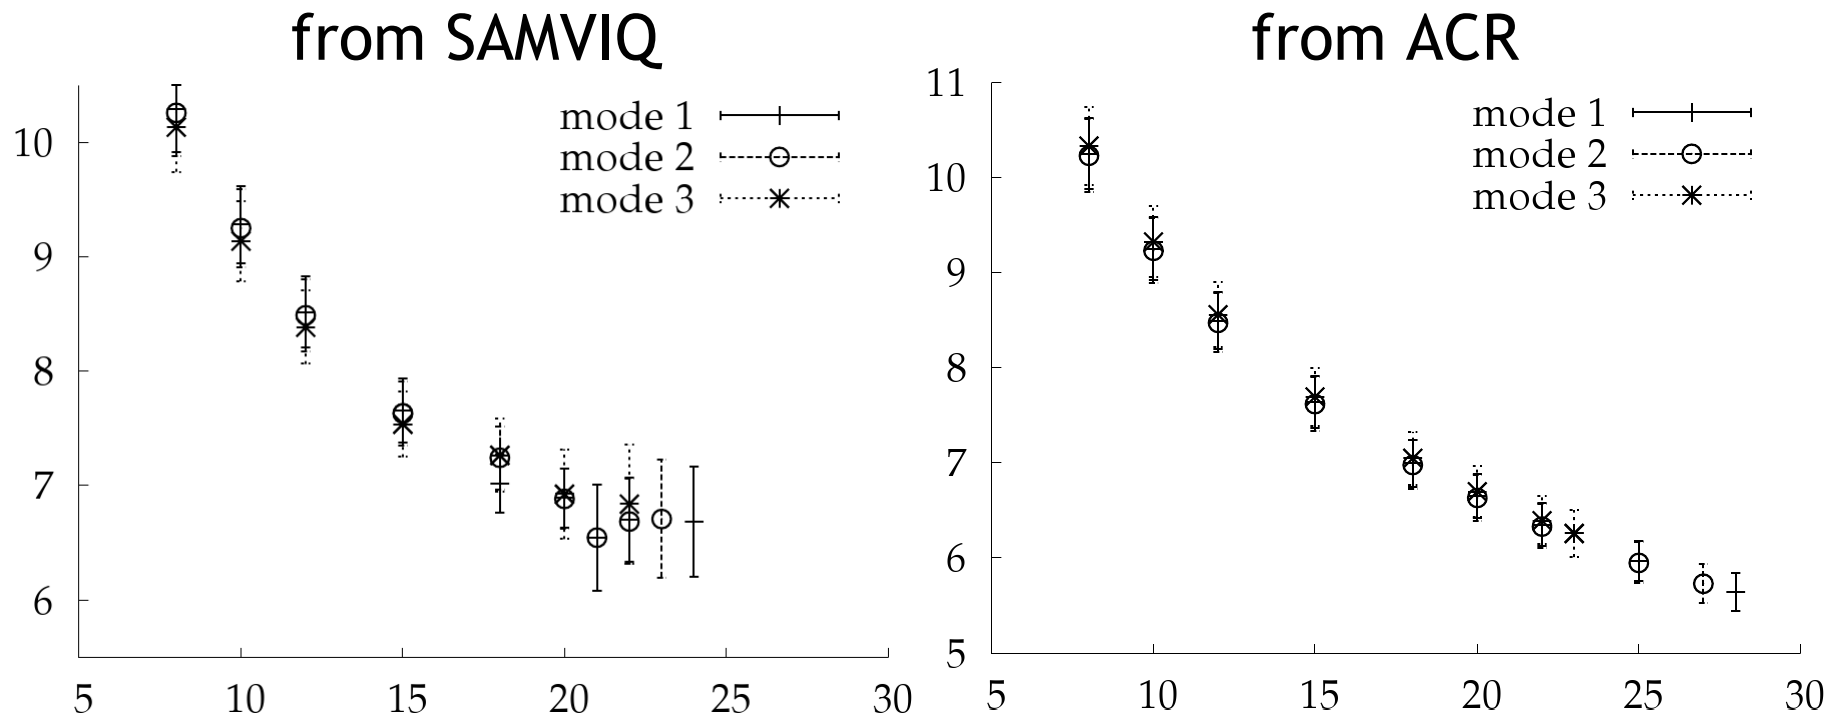

ACR => between 1 and 5

SAMVIQ => between 0 and 100

Philip Corriveau, Christina Gojmerac, Bronwen Hughes, and Lew Stelmach, "All subjective scales are not created equal: the effects of context on different scales," *Signal Processing*, vol. 77, no. 1, pp. 1–9, 1999.

# Confidence intervals and the number of observers

mode 1 : without rejection  
mode 2 : with ACR rejection  
mode 3: with SAMVIQ rejection

# Confidence intervals in function of the number of observers

# observers	CI SAMVIQ	CI ACR
8	10.296	12.815
10	9.284	11.567
12	8.519	10.619
15	7.658	9.550
18	7.014	8.749
20	6.893	8.315
22	6.701	7.940
25	5.964	7.461
