

Information for Authors

VQEG wants the eLetter to be interactive in nature. Readers are encouraged to respond to articles on this eLetter's topic: practice sessions for subjective quality experiments. Response articles can be used to ask questions or provide feedback that could improve the other author's work. Response articles may give knowledge from a related field of study, identify alternate solutions, or provide evidence that a particular technique is unreliable. Please submit response articles to the eLetter editors, Margaret H. Pinson mpinson@its.bldrdoc.gov and Naeem Ramzan Naeem.Ramzan@uws.ac.uk.

A future VQEG eLetter will contain an anthology of articles on objective model validation. Interested authors should contact issue editor Kjell Brunnström Kjell.Brunnstrom@acreo.se. The article submission deadline is June 27, 2014. See the [VOEG eLetter webpage](#) for author instructions and the eLetter template.

Also of interest is the [6th International Workshop on Quality of Multimedia Experience \(QoMEX\)](#). Their paper deadline is May 4, 2014. Authors of recent journal papers can submit a proposal to present an overview poster.

6th International Workshop on Quality of Multimedia Experience

18–20 Sept. 2014 • Singapore
